1. In Neverland, men constitute $60 \%$ of the labor force. The rates of unemployment are $6.0 \%$ and $4.5 \%$ among males and females, respectively. A person is selected at random from Neverland's labor force.
$P(M)=0.60, \quad P(U \mid M)=0.06, \quad P(U \mid F)=0.045$.
a) What is the probability that the person selected is a male and is unemployed?
$P(M \cap U)=P(M) \times P(U \mid M)=0.60 \times 0.06=0.036$.
b) What is the probability that the person selected is a female and is unemployed? $\mathrm{P}(\mathrm{F} \cap \mathrm{U})=\mathrm{P}(\mathrm{F}) \times \mathrm{P}(\mathrm{U} \mid \mathrm{F})=0.40 \times 0.045=\mathbf{0 . 0 1 8}$.

|  | Unemployed | Employed | Total |
| :---: | :---: | :---: | :---: |
| Male | 0.036 | 0.564 | 0.60 |
| Female | 0.018 | 0.382 | 0.40 |
| Total | 0.054 | 0.946 | 1.00 |

c) What is the probability that the person selected is unemployed?
$P(U)=0.036+0.018=\mathbf{0 . 0 5 4}$.
OR
Law of Total Probability:
$P(U)=P(M) \times P(U \mid M)+P(F) \times P(U \mid F)=0.60 \times 0.06+0.40 \times 0.045=\mathbf{0 . 0 5 4}$.
d) Suppose the person selected is unemployed. What is the probability that a male was selected?
$P(M \mid U)=0.036 / 0.054=2 / 3$.
OR
Bayes' Theorem:
$\mathrm{P}(\mathrm{M} \mid \mathrm{U})=\frac{\mathrm{P}(\mathrm{M}) \times \mathrm{P}(\mathrm{U} \mid \mathrm{M})}{\mathrm{P}(\mathrm{M}) \times \mathrm{P}(\mathrm{U} \mid \mathrm{M})+\mathrm{P}(\mathrm{F}) \times \mathrm{P}(\mathrm{U} \mid \mathrm{F})}=\frac{0.60 \times 0.06}{0.60 \times 0.06+0.40 \times 0.045}=\frac{\mathbf{2}}{\mathbf{3}}$.
2. In a presidential race in Neverland, the incumbent Democrat ( $D$ ) is running against a field of four Republicans ( $R_{1}, R_{2}, R_{3}, R_{4}$ ) seeking the nomination.
Political pundits estimate that the probabilities of $R_{1}, R_{2}, R_{3}$, and $R_{4}$ winning the nomination are $0.40,0.30,0.20$, and 0.10 , respectively. Furthermore, results from a variety of polls are suggesting that $D$ would have a $55 \%$ chance of defeating $R_{1}$ in the general election, a $70 \%$ chance of defeating $R_{2}$, a $60 \%$ chance of defeating $R_{3}$, and an $80 \%$ chance of defeating $R_{4}$. Assuming all these estimates to be accurate, what are the chances that $D$ will be a two-term president?

$$
\begin{array}{llll}
\mathrm{P}\left(R_{1}\right)=0.40, & \mathrm{P}\left(R_{2}\right)=0.30, & \mathrm{P}\left(R_{3}\right)=0.20, & \mathrm{P}\left(R_{4}\right)=0.10, \\
\mathrm{P}\left(\mathrm{~W} \mid R_{1}\right)=0.55, & \mathrm{P}\left(\mathrm{~W} \mid R_{2}\right)=0.70, & \mathrm{P}\left(\mathrm{~W} \mid R_{3}\right)=0.60, & \mathrm{P}\left(\mathrm{~W} \mid R_{4}\right)=0.80 .
\end{array}
$$

Law of Total Probability:

$$
\begin{aligned}
\mathrm{P}(\mathrm{~W})= & \mathrm{P}\left(\mathrm{~W} \cap R_{1}\right)+\mathrm{P}\left(\mathrm{~W} \cap R_{2}\right)+\mathrm{P}\left(\mathrm{~W} \cap R_{3}\right)+\mathrm{P}\left(\mathrm{~W} \cap R_{4}\right) \\
= & \mathrm{P}\left(R_{1}\right) \mathrm{P}\left(\mathrm{~W} \mid R_{1}\right)+\mathrm{P}\left(R_{2}\right) \mathrm{P}\left(\mathrm{~W} \mid R_{2}\right) \\
& \quad+\mathrm{P}\left(R_{3}\right) \mathrm{P}\left(\mathrm{~W} \mid R_{3}\right)+\mathrm{P}\left(R_{4}\right) \mathrm{P}\left(\mathrm{~W} \mid R_{4}\right) \\
= & 0.40 \cdot 0.55+0.30 \cdot 0.70+0.20 \cdot 0.60+0.10 \cdot 0.80=\mathbf{0 . 6 3} .

& \mathrm{P}(\text { Stolen })=0.0042+0.0018=0.0060 . \\
& \mathrm{P}(\text { Keys } \mid \text { Stolen })=\frac{\mathrm{P}(\text { Keys } \cap \text { Stolen })}{\mathrm{P}(\text { Stolen })}=\frac{0.0042}{0.0060}=\mathbf{0 . 7 0} .
\end{aligned}
$$

31/4. A warehouse receives widgets from three different manufacturers, A (50\%), B (30\%), and C (20\%). Suppose that 2\% of the widgets coming from A are defective, as are $4 \%$ of the widgets coming from $B$, and $7 \%$ coming from $C$.
a) Find the probability that a widget selected at random at this warehouse is defective.

Law of Total Probability:

$$
\begin{aligned}
P(D) & =P(A) \times P(D \mid A)+P(B) \times P(D \mid B)+P(C) \times P(D \mid C) \\
& =0.50 \times 0.02+0.30 \times 0.04+0.20 \times 0.07 \\
& =0.010+0.012+0.014=\mathbf{0 . 0 3 6} .
\end{aligned}
$$

b) Suppose a widget that was selected at random is found to be defective. What is the probability that it came from manufacturer A? Manufacturer B? Manufacturer C?
$\mathrm{P}(\mathrm{A} \mid \mathrm{D})=\frac{0.010}{0.036}=\frac{\mathbf{5}}{\mathbf{1 8}}$.
$P(B \mid D)=\frac{0.012}{0.036}=\frac{\mathbf{6}}{\mathbf{1 8}}$.
$\mathrm{P}(\mathrm{C} \mid \mathrm{D})=\frac{0.014}{0.036}=\frac{\mathbf{7}}{\mathbf{1 8}}$.

3 $1 / 2$. Seventy percent of the light aircraft that disappear while in flight in Neverland are subsequently discovered. Of the aircraft that are discovered, $60 \%$ have an emergency locator, whereas $90 \%$ of the aircraft not discovered do not have such a locator. Suppose a light aircraft that has just disappeared has an emergency locator. What is the probability that it will not be discovered?

P ( Discovered ) = 0.70,
P ( Locator $\mid$ Discovered $)=0.60$.
$P\left(\right.$ Discovered $\left.{ }^{\prime}\right)=1-0.70=0.30$.
P( Locator ${ }^{\prime} \mid$ Discovered $\left.{ }^{\prime}\right)=0.90$.

Need P (Discovered ' $\mid$ Locator $)=$ ?

|  | Locator | Locator' |  |
| :---: | :---: | :---: | :---: |
| Discovered | $0.60 \cdot 0.70$ <br> 0.42 | 0.28 | 0.70 |
| Discovered ' | 0.03 | $0.90 \cdot 0.30$ <br> 0.27 | 0.30 |
|  | 0.45 | 0.55 | 1.00 |

$\mathrm{P}\left(\right.$ Discovered ${ }^{\prime} \mid$ Locator $)=\frac{\mathrm{P}\left(\text { Discovered' }^{\prime} \cap \text { Locator }\right)}{\mathrm{P}(\text { Locator })}=\frac{0.03}{0.45}=\frac{\mathbf{1}}{\mathbf{1 5}} \approx \mathbf{0 . 0 6 6 6 7}$.

4. In a certain population, the proportion of individuals who have a particular disease is 0.025 . A test for the disease is positive in $94 \%$ of the people who have the disease and in $4 \%$ of the people who do not.
$\mathrm{P}(\mathrm{D})=0.025$,
$\mathrm{P}(+\mid \mathrm{D})=0.94$,
$P\left(+\mid D^{\prime}\right)=0.04$.
a) Find the probability of receiving a positive reaction from this test.

Need $P(+)=$ ?

|  | + | - |  |
| :---: | :---: | :---: | :---: |
